UMass welcomes Alumna Hayley Shi and colleague Chad Wilson, FCAS, from Travelers Insurance to present

“An Introduction to the Actuarial Profession”

Amherst, MA, April 23 -- As college students think about transitioning from the classroom to their careers after they graduate, mathematics students at the University of Massachusetts will get some welcomed good news about careers in the actuarial profession.

On April 23 at 12:00 in Room 917 in the Campus Center, Alumna Hayley Shi and colleague Chad Wilson, FCAS of the Casualty Actuarial Society, both of Travelers Insurance in Hartford, CT, will share an insider's look at the journey from classroom to career in a profession consistently touted by national media as the career of choice because of its robust employment and career growth opportunities, lucrative salaries, challenging work and rewarding experiences.

Students are invited to meet the speakers and learn more about their experiences. In addition, they will announce the newly launched CAS Student Central, an online resource dedicated to helping students navigate curriculum, credentialing, and interviewing, while offering first hand advice from various CAS members, and a calendar of events to pinpoint networking opportunities with practicing actuaries. Lunch will be provided.

For more information about the upcoming event, contact Eric Sommers at esommers@math.umass.edu. For information on how to register for CAS Student Central, go to www.CASstudentcentral.org.
