Math 132
DRAFT Exam 2
March 26, 2009
7:00-8:30 p.m.

## Instructions

- Turn off all cell phones and watch alarms! Put away iPods, etc.
- Do not use a calculator; do not use any "cheat sheet" or other paper.
- Do all work in this exam booklet. You may continue work to backs of pages and the blank page at the end, but if you do so indicate where.
- Organize your work in an unambiguous order. Show all necessary steps.
- Answers given without supporting work may receive 0 credit!
- Be ready to show your UMass ID card when you hand in your exam booklet.

| QUESTION | PER CENT | SCORE |
| :---: | :---: | :---: |
| 1 | 12 |  |
| 2 | 12 |  |
| 3 | 12 |  |
| 4 | 12 |  |
| 5 | 12 |  |
| 6 | 12 |  |
| 7 | 16 |  |
| 8 | 12 |  |
| TOTAL | 100 |  |

The printed exam will have 1 question per 1-2 pages with space for work.

1. $(12 \%)$ You have the following sample values of a function $f(x)$ :

| $x$ | 0 | $1 / 2$ | 1 | $3 / 2$ | 2 |
| :---: | :---: | :---: | ---: | ---: | ---: |
| $f(x)$ | 1 | $4 / 5$ | -1 | 0 | 1 |

Approximate $\int_{0}^{2} f(x) d x$ by using the Trapezoidal Rule with $n=4$ subintervals.
2. $(12 \%)$ Evaluate:

$$
\int\left(x \sqrt{x}+5 e^{-5 x}\right) d x
$$

3. (12\%) Evaluate:

$$
\int \arctan x d x
$$

4. (12\%) Evaluate:

$$
\int \frac{3 x}{x^{2}-5 x+4} d x
$$

5. (12\%) Evaluate:

$$
\int \frac{\sin ^{3} x}{\cos ^{5} x} d x
$$

6. $(12 \%)$ By using the identity $x^{5}=\left(x^{3}\right) x^{2}$, or otherwise, evaluate:

$$
\int \frac{x^{5}}{\left(x^{3}+1\right)^{2}} d x
$$

7. (16\%) If the improper integral converges, determine its value; if it diverges, say so and indicate why:

$$
\int_{e}^{\infty} \frac{1}{x(\ln x)^{3 / 2}} d x
$$

8. $(12 \%)$ Evaluate:

$$
\int \sqrt{2 x-x^{2}} d x
$$
